

HEALTHLENS CLINICAL REFERENCE LABORATORY (SYNTHETIC LAB)

Division of Synthetic Health Informatics • Certified Clinical Diagnostic Reference Engine • Demo License #HL-DEMO-2026

Patient Name:	Piyush Verma	Sample ID / Barcode:	HL-2026-33921
Age / Gender:	20 Y / Male	Referred By:	Dr. R. K. Mehta, MD (General Medicine)
Collection Date:	05-Mar-2026 08:15 AM	Reported Date:	05-Mar-2026 06:00 PM

DEPARTMENT: CARDIO-METABOLIC & ENDOCRINE SCREENING

CARDIOVASCULAR LIPID & THYROID PROFILE

Biomarker / Investigation	Observed Value	Unit	Biological Ref Interval	Status	Methodology
Total Cholesterol	215 *	mg/dL	< 200	HIGH	Enzymatic esterase / oxidase
LDL	138 *	mg/dL	< 100	HIGH	Direct homogeneous assay
HDL	48	mg/dL	> 40	Normal	Direct accelerator clearance
Triglycerides	145	mg/dL	< 150	Normal	GPO-PAP enzymatic
HbA1c	5.4	%	< 5.7	Normal	HPLC Ion-exchange
TSH	2.1	mIU/L	0.4 - 4.0	Normal	Ultrasensitive ECLIA

Clinical Notes: Total cholesterol and calculated LDL are moderately elevated above recommended primary prevention thresholds. Glycemic control (HbA1c) and thyroid function (TSH) are within normal reference limits.

* Indicates biomarker result falls outside normal physiological adult reference ranges.
